The 2012 edition of the National Electrical Safety Code (NESC) is now available. The NESC is the national standard for safety in the design, construction, operation and maintenance of an electric utility system. This regional workshop will bring you up-to-date with important changes that were made to the NESC. Changes that you need to be aware of.

Students will be required to have a copy of the 2012 NESC to use during this workshop. Bring your copy with if you already **have one. If you haven't** purchased a copy yet, MMUA can order one for you. Books are normally \$165 each, but by ordering in bulk we can provide at a discounted rate of \$147 each (plus sales tax). Note: Each city or utility only needs one book if sending multiple people.

Instructor

This regional workshop will be instructed by Vernell Roberts. Vernell has over thirty years experience in the electric utility industry. He has extensive electric distribution operations, maintenance, and substation experience as well as an in-depth knowledge of safe work practices and related safety standards. Vernell is a Regional Safety Coordinator and Job Training and Safety Instructor for MMUA.

Regional Workshop—2012 NESC Update

Who Should Attend?

Any personnel who are responsible for or who make decisions concerning the transmission and distribution system. This can include managers, safety professionals, electric utility engineers, designers, technicians and all field personnel.
