

# YOUR **GREEN** **BACK\$**

As part of the statewide effort by municipal utilities to promote energy efficiency, we're offering **rebates** to customers who install **energy efficient products**. Not only will you add some **green** to your wallet with our rebates, you'll continue adding **green** every month on reduced energy bills.

For example, clothes washers that do not meet Energy Star qualifications use up to **70% more energy** than energy efficient models. Over the life of your appliances, that kind of energy consumption can translate to **hundreds of extra dollars** spent on utility bills. It's also a waste of valuable energy resources.

**It's easy to take advantage of our great rebates.** Pick up a rebate application from our office, your appliance dealer, or lighting contractor. A copy can also be downloaded from our website: **[insert your website here]**. Just call us at **[your phone # here]**, if you have any questions.

Put some **green** in your wallet and the environment through **energy efficient rebates** and **energy use reduction!**
