MMUA Services and Programs During the COVID-19 Emergency

March 25, 2020

MMUA Office
The MMUA office will not be staffed through April 10 under the Governor’s Stay Home Executive Order. Our staff continue to monitor and respond to legislative and regulatory activity at both the state and federal levels.

Information Sharing
We now have both publicly facing and confidential sections on the MMUA website for providing COVID-19 informational materials. MMUA staff are happy to respond to requests for information and assistance in dealing with this unprecedented situation.

Travel
MMUA staff travel outside of Minnesota and nonessential in-state travel are suspended until further notice. Scheduled field staff visits to member communities are suspended through April 30. Resumption of in-person visits will be considered as we approach April 30.

Field Staff
During the period when in-person visits to members are suspended, field staff members will continue to work on projects for their communities. Field staff will maintain contact with their communities and respond to community needs as appropriate. Training may be delivered remotely by field staff using telephone, webinar, or other technology. Field staff members have accumulated a wide variety of helpful materials that they can provide to their communities.

Meetings and Workshops
- The PCB Workshop (March 17-18) has been cancelled.
- The Substation School (March 24-26) has been postponed.
- The Legislative Conference (March 31-April 1) has been cancelled.
- The Generation School (April 21-23) has been postponed.
