

OQ records review

I have just completed the OQ records review for everyone and that information has been sent out. If you have not received your records please contact me ASAP and I will re-send it.

MNOP's Inspections/Schedule

I will be meeting with MNOP's on Wed. Jan. 21st. to discuss the inspection schedule for the year. What I know at this time is that they have approximately 115 inspection events planned with operators that are part of the MMUA program. This includes O&M, Public Awareness, DIMP, OQ, Damage Prevention and Drug & Alcohol inspections. So as you can see another very busy year of inspections. My hope is to do some of these inspections at the MMUA office to save time and miles but I'll know more after our meeting. We have already started scheduling inspections in Feb. in hopes of getting an early start.

On the bright side it appears I will have some help at least part time to fill in when I need to be in 2 places at once.

Annual Fusion/mechanical coupling Qualification

If you have dates in mind for your annual re-qualifications let me know ASAP so we can get them in my schedule before it starts filling up with inspection dates etc.

Annual Reviews/Reports

Just a reminder that as we finish one year and start another it's a good time to review all the plans that require it.(O&M,Public Awareness, OQ etc.) Documentation of these annual reviews has been found lacking in many instances over the last year. If these plans are maintained separately from the O&M they must be documented separately (log sheet etc.) if they are all part of the O&M than 1 log sheet will be sufficient. Also DIMP plans should be updated with your annual report info. , they don't have to be revised every year but should be updated. (Let me know if you need help.)

*Have a Great "2015"
Work Safe!*
